## Concrete & Clay Jointing Compounds

### Jointing Compounds, Designed & Packaged For Your Needs

**MacDermid** strive to develop products with a complete understanding of the application needs and problems. That's why our pipe sealants and lubricants are recognised as the most versatile and reliable products in use today. Each compound is specifically developed and designed to be substrate compatible, ensuring you get reliable, water tight joints every time.

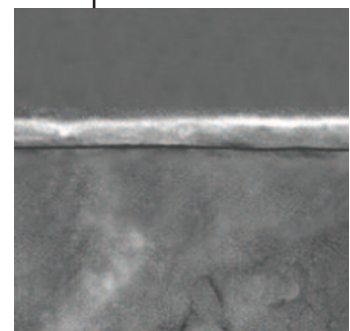

Our concrete and clay jointing compounds are available in packaging that also helps to ensure accurate product application and minimal waste.

When you need jointing compounds that meet all your needs, trust MacDermid.

#### Key Features

- Optimised for high load carrying applications
- Prevents 'seal swell'
- Machine protection
- Excellent lubricity ensures seal integrity
- Compatible with clay pipe couplings
- Compatible with all seal materials (polyurethane, EPDM, NBR & SBR)
- Water Soluble and Non Toxic
- Can be applied in wet conditions

## Concrete & Clay Jointing Compounds

### Jointing Compounds Tailored To Your Needs

No matter what the jointing application, MacDermid have developed jointing compounds to fit the need and provide the applicator with the tools to overcome common problems like “seal roll” and “wash off”. Each jointing compound is engineered with a strong technical appreciation of the most common problems associated with pipe jointing and helping to avoid or overcome these is what makes our Vinoleo products valued by customers.

**VinoleoSL:** A silicone liquid which improves the flow of concrete to the seal lip thus reducing the potential for porosity and pitting during the manufacture of concrete pipes.

Product Range		
Application	Products	Benefits & Usage
Concrete Pipes	Vinoleo 80/2	Heavy duty, high lubricity product
	Vinoleo VS	General purpose product
	Vinoleo ME	High resistance to wash off for high water tables
	Vinoleo Bio	Bio degradable synthetic ester
Clay Pipes	Vinoleo 657	General purpose product
	Vinoleo SS	Aerosol, ideal for drains and gulleys
Pipe Manufacture	VinoleoSL	Silicone liquid minimises concrete to seal pitting during spinning/casting

It takes more than innovative, high performance products and superior technical service to help our customers compete and win in today's global marketplace. It takes a total commitment to understanding their needs and the ability to provide the right solutions—every time.

When success is your only goal, trust MacDermid.

## Plastic Jointing Compounds

### Pipe Jointing Compounds From The Technology Leader

**MacDermid Pipe Jointing Compounds** are recognised as the most versatile and reliable products in use today. Each compound is specifically developed and designed to be substrate compatible with PVC, PE & ABS pipes ensuring you get reliable, water tight joints every time.

Our non hazardous 77/14 is approved by the Water Regulations Advisory Scheme and is available in a range of product packaging including tubes, pots and drums to ensure minimal waste and simple, efficient installation.

When you need jointing compounds to meet even the most demanding application, trust MacDermid.

#### Key Features

- Simple, effective product application
- Optimised for different substrates
- Prevents 'seal roll' and 'seal swell'
- Water soluble and non toxic
- Compatible with clay pipe couplings
- Compatible with all seal materials (polyurethane, EPDM, NBR & SBR)

## Plastic Jointing Compounds

### Jointing Compounds Tailored To Your Needs

No matter what the jointing application, MacDermid have developed jointing compounds to fit the need. Vinoleo products provide excellent cost efficient solutions for joint integrity and the exact product you need to overcome common problems like 'seal roll', 'wash off' and 'anti bacterial' resistance.

Product Range		
Application	Products	Benefits & Usage
Plastic Pipes	Vinoleo 77/14	Cost effective, high performance product
	Vinoleo VS	General purpose product
	Vinoleo 80/9	High resistance to wash off for high water tables
	Medlube	Antibacterial for critical applications
	Vinoleo Bio	Bio degradable synthetic ester
Silicone Products	Vinoleo SG	Grease with high temperature stability
	Vinoleo SE	Emulsion liquid used for multiple applications
	Vinoleo SS	Aerosol, ideal for drains and gulleys

It takes more than innovative, high performance products and superior technical service to help our customers compete and win in today's global marketplace. It takes a total commitment to understanding their needs and the ability to provide the right solutions—every time.

When success is your only goal, trust MacDermid.

## Steel & Iron Jointing Compounds

### Jointing Compounds, Tailored To Every Application

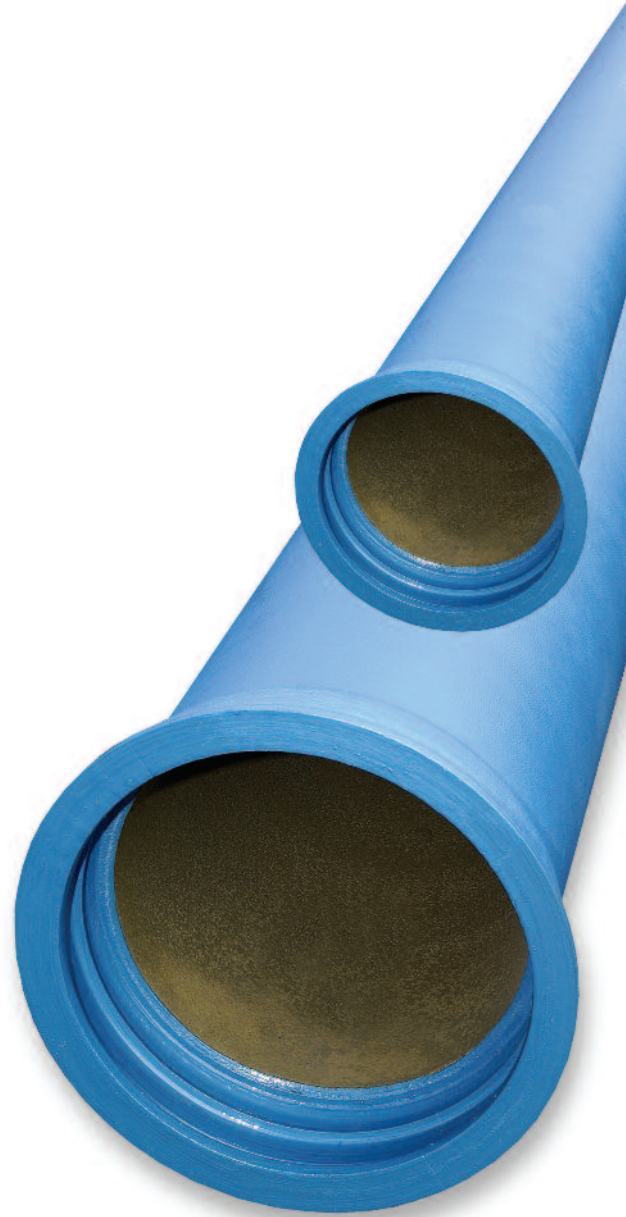

MacDermid's jointing compounds have built a reputation for products specially developed and manufactured to meet the unique pipe jointing criteria of each pipe material. High load bearing requirements of Steel, Iron and Stainless Steel joints are easily met with these products from our Vinoleo range.

Vinoleo's excellent load carrying capacity and lubricity ensures optimum jointing security and maximum seal integrity everytime.

When you need jointing compounds that meet your specific substrate needs, trust MacDermid.

#### Key Features

- Optimised for iron, steel and stainless steel
- High resistance to wash off
- Easy application in both 'wet' or 'dry' conditions
- Prevents miss aligned seals and open joints
- Resists bacterial joint infiltration
- Compatible with all seal materials (polyurethane, EPDM, NBR & SBR)

## Steel & Iron Jointing Compounds

### Jointing Compounds Tailored To Your Needs

No matter what the jointing application, MacDermid have developed jointing compounds to fit the need and provide the applicator with the tools to overcome common problems like 'seal roll' and 'wash off'. The high load bearing requirements for metallic pipes are easily provided for within our Vinoleo range. So too are the high lubrication values required for Asbestos pipe. We offer Vinoleo products suitable for all pipe materials including Steel, Stainless Steel, Malleable Iron, Asbestos, Copper and Copper Alloys.

Product Range		
Application	Products	Benefits & Usage
Steel, Malleable Iron, Asbestos	Vinoleo80/2	Specified by major iron pipe manufacturer
	Vinoleo ME	High resistance to wash off for high water table areas
	Vinoleo VS	Multi substrate product
	Medlube	Best resistance to bacteria and freezing
Silicone Products	VinoleoSG	Silicone grease with high temperature stability
Copper	Medlube	Best resistance to bacteria and freezing

It takes more than innovative, high performance products and superior technical service to help our customers compete and win in today's global marketplace. It takes a total commitment to understanding their needs and the ability to provide the right solutions—every time.

When success is your only goal, trust MacDermid.
